

The electricity kept going on and off at my home and I was worried about maintaining wifi service, so I did not get to my third point.

The village of Menands has very different needs than those of North Albany. While Menands is concerned with a food desert and convenient retail services, North Albany is concerned with gun violence, food INSECURITY, and job training/ employment. They are two very disparate communities of interest; and it will end in a diluted MMD which will not be properly represented

The 14th legislative district is split among multiple municipalities, as well with disparate needs, and will also end up without proper representation.

I am concerned that the commissioners are only looking at numbers, instead of communities.

Again, thank you for all your time and work on this.

Sincerely,
Alison McLean Lane
